

## Plasma Physics and Controlled Fusion

<b>Version</b>	2020/1
<b>Effective from (date of when the course was developed)</b>	23/05/2017

<b>ECTS Credits</b>	4
<b>Level/Year</b>	Bachelor (after 2nd semester), Master and PhD students
<b>Teaching (contact) hours</b>	36
<b>Total learner managed hours (incl. self-work)</b>	108
<b>Total hours of student learning</b>	144

<b>Pre-requisites</b>	Knowledge of Calculus and General Physics corresponding to the first two years of a Bachelor's degree program in science, technology, engineering, mathematics. Good command of English. All classes and extracurricular activities are conducted in English.
<b>Co-requisites</b>	None
<b>Alignment to graduate profiles</b>	This course contributes to achievement of the graduate outcomes of the following qualifications: <ul style="list-style-type: none"> <li>• Bachelor of Physics</li> <li>• Master of Physics</li> <li>• Graduate Diploma in Physics</li> <li>• Diploma in Physics</li> </ul>
<b>Course aim</b>	The primary objective of the course is to present the fundamentals of plasma physics particularly highlighting high-temperature plasma physics and its applications to controlled fusion. The course begins with an overview of plasma phenomena and their applications.
<b>Indicative Course content</b>	Plasma phenomena on Earth and in the Universe; contemporary research areas and technological applications of plasmas; studies of controlled nuclear fusion. Definition of plasma; quasineutrality, Debye length, plasma frequency. Coulomb collisions, Rutherford's formula, Coulomb logarithm. Motion of a single charged particle in magnetic field; Larmor radius, drifts, magnetic traps. Controlled nuclear fusion; Lawson criterion and ignition criterion. Overview of nuclear fusion research activities in Japan. Principles of plasma heating with electromagnetic waves and neutral beam injection. Principles of plasma diagnostics, active and passive measurements, line-integral data, Doppler broadening. Plasma spectroscopy. Magnetic confinement of plasma in toroidal systems. Magnetohydrodynamics. Transport in fusion plasma.

### LEARNING OUTCOMES

<b>On successful completion of this course students will be able to:</b>	
<b>1</b>	Describe the plasma state of matter and its basic properties
<b>2</b>	Describe contemporary plasma technologies
<b>3</b>	Explain single particle confinement in magnetic field and transport phenomena
<b>4</b>	Explain principles of plasma diagnostics and plasma heating
<b>5</b>	Describe contemporary nuclear fusion research activities

#### ASSESSMENTS

<b>Basis of assessment</b>	Achievement based assessment		
<b>Methods of assessment</b>	<b>Learning Outcomes</b>	<b>Pass criteria (Minimum)</b>	<b>% Weightings</b>
Summative review	1, 5	40%	40%
Portfolio – summative of practices	2, 3, 4	40%	60%

#### REQUIREMENTS FOR SUCCESSFUL COURSE COMPLETION

<b>Requirements</b>	Mark of 40% or more in every summative assessment
---------------------	---

#### RESULTS

<b>Assessment results</b>	Results for assessments are given in percentage marks
<b>Course results</b>	<ul style="list-style-type: none"> <li>• Individual assessments may cover one or more of the learning outcomes.</li> <li>• Each summative assessment is assigned a percentage weighting.</li> <li>• The overall percentage mark for the course is calculated by adding the weighted results for all summative assessments.</li> </ul>

#### LEARNING AND TEACHING

<b>Learning and teaching approaches</b>	Lectures, seminars and group discussions, learner managed activities, laboratories.
<b>Learning and teaching resources</b>	Textbooks, journals and library resources; use of Internet; computer software.
<b>Learner managed activities</b>	<ul style="list-style-type: none"> <li>• Completion of course work, set assignments</li> <li>• Reading of course materials</li> <li>• Study group work</li> <li>• Preparation for classes</li> <li>• Practicing relevant skills/methods/techniques</li> <li>• Self-evaluation of course work</li> <li>• Gathering relevant contextual information/ issues/ideas to build knowledge of the subject</li> </ul>
